Horrors of War

War is an armed conflict between two or more states. When such conflicts assume global proportion, they are known as World war. War between different parts or factions of the same nation is called civil war.

After analyzing the whole history of war, it can plainly be said that we had always been full of horror. The war ever resulted in destruction, death, massacre and diseases. Ever then when warriors used to fight face to face, the destruction, of war is dreadful. Ever then when warriors used to fight face to face, the destruction of war is dreadful. The after effects of war were even more horrible.

“What is evil?..... Whatever springs from weakness”

The world of today is the world of science and technology. Man has invented and discovered many and numerous astonishing equipments, instruments and tools to make his life more comfortable and easy. But paradoxically, he has also invented most deadly weapons for his total extinction. Now – a – days, most of the countries of world have nuclear warheads, germ warfare and chemical bombs. As it is said that

“War is the science of destruction”

Now the world has become a global village. Many countries are connected with one another economical politically and socially. If war breaks out, the other countries can not be neutral. They will have to intervene for their own benefits. If this happens, any war would be a world war.

War produces a sense of conflict and deprivation among nations. They have become enemy and looked towards one another in a hostile manner. So both of nations deprived of benefits provided to one another. As it is said that,

“There is as much punishment to the punisher as to the sufferer”

War is, in fact, a man’s massacre on a massive scale. Death falls from firmament and erupted form earth. It spares no one. The

innocent expire the soldiers suffer and population perishes. Starvation and fatality are the ultimate up-shot of war. War results in fears and tears.

War brings about irreparable destruction of material assets. Property is wrecked. Buildings are ruined. Sky scrapers, huge factories, roads, schools, colleges, railways, runways, university houses and art galleries, all are changed into debris.

**“If war comes, it will be from the failure
of human wisdom”**

War is also the worst foe of our culture and civilization. Our cultural assets, matchless manuscripts, unique cultural heritage and antiques, all are demolished. War extinguishes beauty, smother morality and razes reason. The paragon of beauty and crown all are converted into ashes.

The after effects of war were more horrible than the war itself. It is said that,

**“Who perish in war are less unfortunate
than those who survive”**

Infants weep for their mothers and mothers cry for the infant babies. Everyone became ruined. Young girls survive homeless. Some are crippled, some are mad and some widows with their babies in their arms began to weep and cry.

What a misery appears after war!

Let the world think about it. They must do some solid and sincere steps to stop the war. Let the world come on a negotiation table to solve the problems through debates and dialogues.

UNO must realize its duty and take some steps to stop the war and solve the disputes among nations through peaceful means because

“Wars are no solution to human problems”

Quaid – e – Azam also believed in debates and parleys. He held sessions to solve the problems. May Allah bless upon us (**Ameen**).
